DETAILED ACTION

This is in response to a letter for patent filed on September 17th, 1998 in which claims 1-59 are presented for examination. Claims 1-59 are pending in the letter.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. The specification is objected to under 35 U.S.C. § 112, first paragraph, as failing to adequately teach how to make and/or use the invention. The specification is enabling for a portion of the subject matter claimed but the enablement is not commensurate in scope with the claim. Specifically, the specification fails to show how the single step of establishing... of claim 1 can perform the claimed functions. Thus, it would require undue experimentation for a person having ordinary skill in the pertinent art to make and use the invention as disclosed and claimed.

A single means claim, i.e., where a means recitation does not appear in combination with another recited element of means, is subject to an undue breadth rejection under 35 U.S.C. 112, first paragraph. *In re Hyatt*, 708 F.2d 712, 714-715, 218 USPQ 195, 197 (Fed. Cir. 1983) (A single means claim which covered every conceivable means for achieving the stated purpose was held nonenabling for the scope of the claim because the specification disclosed at most only those means known to the inventor.). When claims depend on a recited property, a fact situation comparable to *Hyatt* is possible, where the claim covers every conceivable structure (means) for achieving the stated property (result) while the specification discloses at most only those known to the inventor.

3. Claims 1 is rejected under 35 U.S.C. § 112, first paragraph, for the reasons set forth in the objection to the specification. Single means claims 1 is subjected to an undue breadth rejection. See *In re Hyatt*, 218 USPQ 195 (CAFC 1983).

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

5. Claims 1-59 are rejected under 35 U.S.C. 102(e) as being anticipated by Yamamoto et al (U.S. Patent No. 5,914,878).

6. As per claim 1-5, 9-15, 23, 24, 27, 28, 37, 42, 44, 46, 47, Yamamoto et al teach a part management information system (a raw material ordering system) for managing order placed and order received by shops displaced as independent work unit (see abstract, fig. 33, 34, column 1 lines 12-25) comprising display control for displaying icon/identification unit identifying order received or placed and data indicating status of order received or placed (see abstract, column 1 lines 60-2 line 26, column 4 line 31-6 line 24, 22 lines 49-23 line 60).

Art Unit: 2155

7. As per claim 6, 7, Yamamoto et al teach a system wherein the managed items (added, delete and changed) include expected and order characteristic (see column 13 line 40-14 line 29).
8. As per claim 8, Yamamoto et al teach a system wherein the data is updated upon downloading.(see abstract, fig. 33, 34, column 1 lines 12-25).
9. As per claim 16, 17, Yamamoto et al teach a system wherein the reading extracts and reads only data required for the displaying the managed items display stored in the storage means (see column 22 line 15-23 line 60).
10. As per claim 18, Yamamoto et al teach a system wherein the data is the number of orders received or orders placed (see column 22 line 15-23 line 60).
11. As per claim 19, 20, Yamamoto et al teach a system wherein the period of the graph is set by an initial display and the number of days with a default value of five (see column 26 line 14-56).
12. As per claim 21, 22, 25, 26, Yamamoto et al teach a system further comprises a third and a fourth display control for switching a display angle and setting a data updated data and parts delivery date (see column 22 line 15-23 line 60).

Art Unit: 2155

13. As per claim 29-32, 38-40, 43, 45, 49, 50, 54, 55, 59, Yamamoto et al teach a part management information system (a raw material ordering system) for managing order placed and order received by shops displaced as independent work unit (see abstract, fig. 33, 34, column 1 lines 12-25) comprising display control for displaying icon/identification unit identifying order received or placed, information of selected managed item and reading means for reading data indicating status of order received or placed from storage, information of selected managed item (see abstract, column 1 lines 60-2 line 26, column 4 line 31-6 line 24, 22 lines 49-23 line 60).

14. As per claim 33, 41, Yamamoto et al teach a system wherein the second display control means displays the same (see column 22 lines 49-23 line 60).

15. As per claim 34, 35, 36, 51, 52, 56, 57, Yamamoto et al teach a system the second and third display control means varies a display position and a display size on a screen (see column 26 line 14-56).

16. As per claim 48, 53, 58, Yamamoto et al teach a system wherein the managed items are display as combinations of icon for identifying orders (see column 22 lines 49-23 line 60).

Conclusion

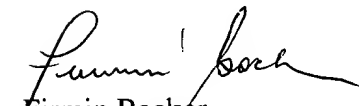

17. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. (5,204,821, 5,983,202, 5,720,157, 5,608,621, 5,799,289, 5,254,329).
